Submitter Information

General Comment

The Chesapeake Bay is almost dead. This administration was supposed to clean up the environment. The Chesapeake Bay would be a great place to start, before it turns into a septic system. We can change it back to a thriving ecosystem, but the Federal Government needs to take the lead.

The Chesapeake Bay can't afford more excuses and delay! Do your job and finalize a strong, accountable final TMDL, and work with the states to ensure that their plans will deliver much-needed results.

Thank you.
